

# DRAPE MIRROR 1

Made to order in a variety of sizes, materials, and finishes

Shown in blackened steel and satin bronze

Clear mirror

30" w x 48" h, can be oriented vertically or horizontally

Kin & Company's characteristically curvilinear forms are translated into a gently meandering line evocative of tapestry, an undulating horizon, or a rolling landscape. The metal surface delicately drapes over the mirror, partially obscuring the reflection of the viewer and the world beyond, replacing it instead with the quiet depth of the patinated steel, bronze, or copper.

Made in Brooklyn, NY
