

Made to order in a variety of sizes, materials, and finishes

Shown in steel with a heat-treated finish
Starphire Glass lay-on top

36" dia x 15"h

Rolled sheets of steel curl and peel away beneath a transparent glass surface, capturing the dynamic moment of a cresting wave. The vibrant multicolored steel surface is created through a unique heat treatment process through which molecules realign to capture and reflect selective wavelengths of light.

Made in Brooklyn, NY
